

COCKTAIL

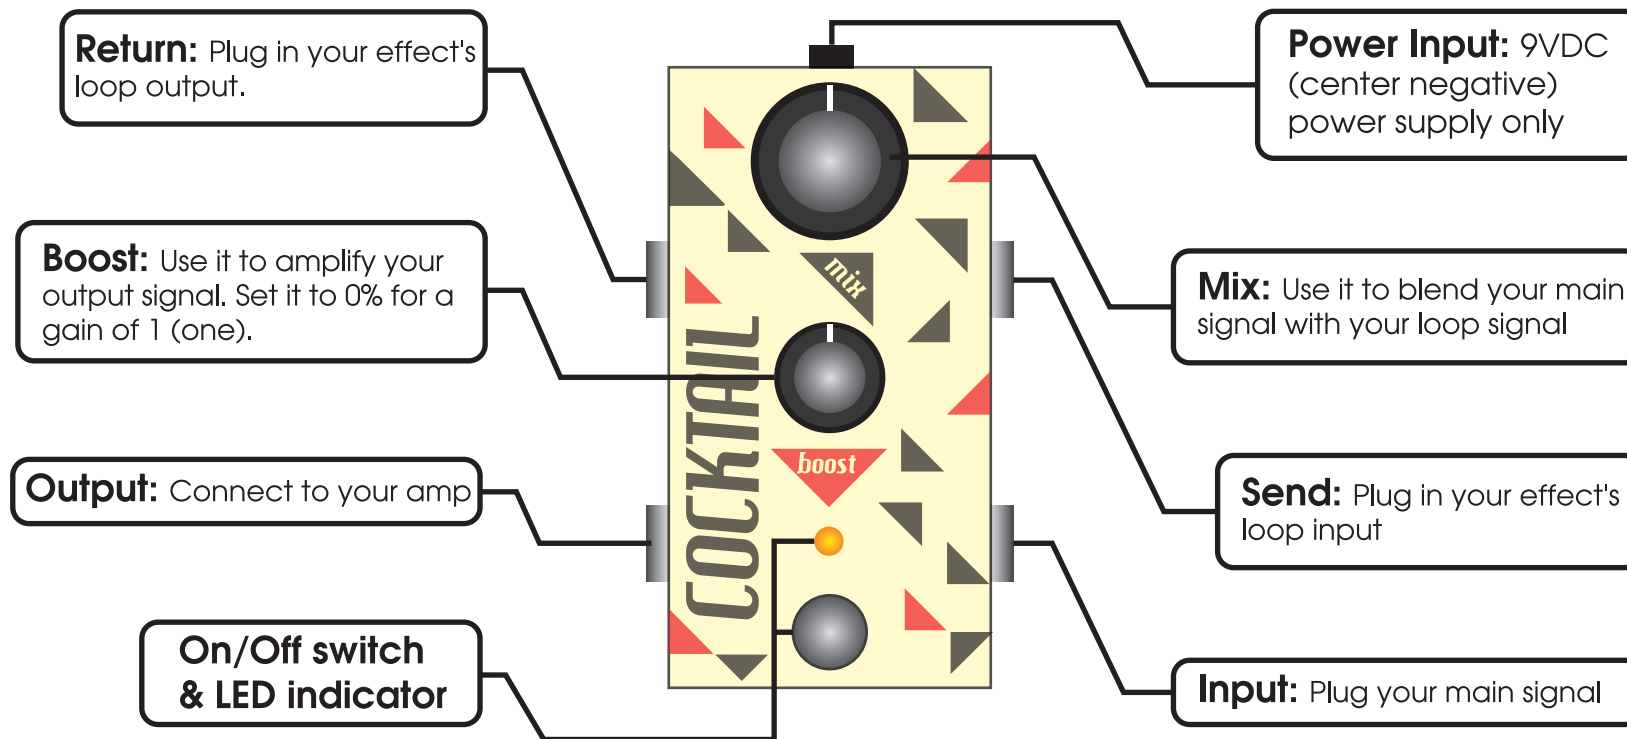

LOOPER - MIXER

Cocktail is an 100% analog true by pass loop box, that allows you to mix your wet signal with your original sound. This pedal works perfectly on any instrument.

Cocktail's functions are as following:

- effect looper
- effect mixer
- clean booster
- a 2 channel active mixer
- an A/B box

This pedal is guaranteed to give your effects the versatility they miss.

ANALOG
IS ALL YOU NEED

OPERATIONS

Effects Looper - Mixer: Follow the instructions on the left schematic.

Clean Booster: Set Mix at 0% and Boost at your desired level.
2 channel active mixer: Plug your 1st signal in the Input jack and your 2nd signal in the Return jack. Use the Mix knob to blend the 2 signals. Boost at your desired level.

A/B box: Plug your 1st signal in the Input jack and your 2nd signal in the Return jack. Set Mix at 100% and Boost knob at 0%. Use the on/off switch to change between the 2 signals.
